Dear Leon,

This is to advise you of a new building stone quarry operator doing business in the area. The operator is Bill Hamm of Idaho Quartzite Corp. He has been operating out of the Nampa-Caldwell area but has recently purchased a home in Oakley so you should be able to reach him.

He is doing quarry work on property owned or under claim by D. & K. Nelson from the Lynn, Utah area. He is also working in a quarry owned by Pickett Ranch and Sheep Co. of Oakley, Idaho (208-862-3482). This is an extensive working area that has been operated by American Stone Co. of Salt Lake City and others in the past. The quarry is visible from the road and is located about 1/2 mile west on the road that goes to Grouse Creek from the old junction school building in the Lynn area. See Yost Quadrangle Topo map.

I trust that you will follow up on this person since they have big ideas and past reputation is not good. If you need additional information call me or Bryce Tripp, State of Utah, Department of Natural Resources, Utah Geological Survey, 467-7970 who is familiar with most of these operations.

Sincerely,

Gary Mullard
